

KRISH PATEL

Computer Engineering Student | Full Stack & Frontend Developer
Ahmedabad, Gujarat, India | 9726632563 | krishrpatel09@gmail.com | portfolio: webaarc.netlify.app

PROFILE

Computer Engineering student (Semester 7, Monark University) with hands-on full-stack development experience building production web apps and IoT-integrated hardware products. Skilled in React, Next.js, TypeScript, and Firebase, with proven ability to independently design, build, and ship complete projects from concept to deployment, including a self-built startup (Voltefy) and a 125+ tool SaaS platform (ToolVerse). Freelance experience delivering client websites on Fiverr. Seeking to apply strong problem-solving and full-stack skills in a dynamic engineering role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js

Styling & Animation: Tailwind CSS, Framer Motion, GSAP

Database & Backend: MongoDB, Firebase (Firestore, Auth), Razorpay API

IoT & Hardware: ESP32, Arduino, embedded firmware, sensor integration

Tools & Platforms: Git, GitHub, Vercel, VS Code, Postman

Other: UI/UX Design, SEO fundamentals, REST APIs

PROJECTS

Voltefy | Founder & Developer

2025 – Present

- Built a smart power bank rental startup end to end: Next.js 15 web app, Firebase backend, Razorpay payments, deployed on Vercel.
- Designed and programmed ESP32-based kiosk firmware for rental/return control, running in AP mode with real-time device communication.
- Defined the full business model, including a refundable deposit system, per-hour rental pricing, and a referral credit program.

ToolVerse | Founder & Developer

2025 – Present

- Developed a 125+ tool web platform (toolverse-io.vercel.app) using Next.js, TypeScript, and Tailwind CSS.
- Implemented SEO architecture including dynamic metadata, JSON-LD schema, sitemap generation, and flat URL structure to drive organic traffic.
- Designed and built an animated virtual pet mascot feature ('Verse') with interactive stats and activity states, using Framer Motion / React Three Fiber.
- Planned and executed monetization strategy including ad placement and AdSense readiness.

E-Commerce Website | Developer

2025

- Built a React-based e-commerce web application featuring product listings, cart, and checkout flow UI.
- Currently extending the project into a full-stack application with backend and database integration.

Client Website – Akshar ID Cards | Freelance Web Developer

2025

- Delivered a production Next.js website for an Ahmedabad-based client, including SEO fixes and performance improvements.

EDUCATION

Monark University | B.E. in Computer Engineering

2023 – Present

Avg CGPA : 9.6/10

INTERNSHIP EXPERIENCE

Full Stack Development Intern | BuiltUp Technologies, AhmedabadJan 2025 – Apr 2025

- Completed a 3-month internship focused on full stack development with daily hands-on training.
- Gained real-world project experience contributing to production-level features.

LANGUAGES & INTERESTS

Languages: Hindi, English, Gujarati

Interests: Exploring new technologies, sketching/drawing
